Garden Glow Dogwood

Cornus hesseyii 'Garden Glow'

Garden Debut®

The color on this dogwood will blow your little socks right off! Vivid chartreuse yellow leaves pop in the summer, complimented by dainty white flowers through the season. Foliage then gets festive for the fall, turning an autumnal burgundy red. But wait; there's more! Foliage drops in the winter, revealing gorgeous red twigs, perfect for use in flower arrangements or just to add a little color to normally bland winter landscapes. What more could this dogwood possibly do for you?!
